

CUSTOMER RELATIONSHIP MANAGEMENT

Welcome to our presentation on the power of Customer Relationship Management (CRM). Learn how CRM can transform your business and boost customer loyalty.

FEATURES OF CRM

This CRM is a Laravel-based full-stack app providing authenticated user/profile management, role-gated admin features (users, settings), and CRUD workflows for Customers, Enquiries (including a drag-and-drop enquiry board and status update endpoint), Estimates and Estimate Items with PDF generation, and Stages for pipeline management; it follows standard MVC with explicit route groups.

SECURE USER AUTHENTICATION IN LARAVEL

- Clean Design: Simple, organized layout with clear fields for Email and Password.
- Easy Access: Includes helpful links for "Register" (to create a new account).
- Convenience: Features a "Remember Me" checkbox to stay logged in.

CUSTOMER MANAGEMENT

- Create (Add): Fill out and submit this form to add a new customer record.
- Read (View): All saved customers are listed to view their details.
- Update (Edit): You can modify a customer's information using this same form, pre-filled with their current data.
- Delete (Remove): A simple action to permanently remove a customer (always requires confirmation).

ENQUIRY MANAGEMENT

- Create (New Enquiry): Use the dedicated form to add a new sales lead or opportunity.
- Read (View): Track all your opportunities through both a comprehensive list and the visual Kanban Board, which shows current stages.
- Update (Edit Status): Quickly change the enquiry's status by simply dragging and dropping the card from one column.
- Update (Details): Modify the full details of any enquiry by editing it via the original form.
- Delete (Remove): Permanently clear out old or irrelevant enquiries, always confirming the action to prevent mistakes.

STAGES MANAGEMENT

- Administrators use the full CRUD functionality to Create, Read, Update, and Delete the sales stages (statuses), directly controlling the options available in the Enquiry form's Status dropdown.

All Stages

+ Add Stage

ID	Name	Actions
6	Lost	ViewEditDelete
5	Won	ViewEditDelete
4	Estimate Sent	ViewEditDelete
3	Contacted	ViewEditDelete
2	New Lead	ViewEditDelete

ENQUIRY KANBAN BOARD

This feature provides a live, visual pipeline of all sales opportunities, transforming the static enquiry list into a dynamic board. Users can easily track the sales journey by seeing enquiries organized into customizable status columns (like New Lead or Estimate Sent). The primary tool for managing progress is drag-and-drop functionality, which allows users to instantly update an enquiry's status by moving its card from one column to the next.

ESTIMATE MANAGEMENT

- This form allows you to create a detailed estimate with items and pricing, offering a choice to either "Save as Draft" internally or "Send Estimate" which automatically saves, generates a PDF, and emails it to the customer.
- The complete CRUD process lets you Create new estimates, Read (view) their status, Update (edit) drafts, and Delete unwanted records.

Send Estimate

Save as Draft

SYSTEM SETTINGS MANAGEMENT

- This form is used to configure and update the application's core identity and branding, allowing you to change the Company Logo, Name, contact details (Email/Phone), Currency Code, and Primary/Secondary color scheme.
- The core operation here is Update: you review the current settings and use "Save Settings" to instantly apply the changes across the entire system.

USER MANAGEMENT (ROLES & PERMISSIONS)

- Create (Add New User): Use this form to onboard new team members, requiring their Name, Email, and Password, and assigning their access level via Account Type (Admin or User).
- Read (View): Maintain an overview of your team by viewing a complete list of all users, their assigned roles, and their contact information.
- Update (Edit): Easily modify a user's details, such as updating their contact info, resetting their password, or changing their Account Type/Role.
- Delete (Remove): Remove users who no longer need system access (always requires confirmation).
